[Forklifts in your I-phone....](#)

With the new, BS Forklifts, iphone app you will never have to miss the arrival of new stock at the BS warehouse again. The official app is free to use and available for download at the Apple app store.

Using the app you can view all the latest additions to the BS stock whenever and wherever you want.

#### How does it work?

Simply go to the Apple app store, select the BS App (it's easily recognizable by it's BS Logo) and download it to your iphone. When new stock arrives the app will alert you by showing an update on it's BS logo.

Select the app and you can see all the new arrivals, with pictures and specifications, exactly as you would at the BS website but direct to your iphone.

The BS app allows you to keep up-to-date as new stock arrives. It will instantly inform you of new arrivals so that you can find the truck that you need.

#### Benefits

At a time when machines are hard to find and quickly sold the new BS app will allow you access to 'real-time' stock updates.

BS Forklifts consider it important to keep pace with today's trends giving you new and innovative ways to find the machines you require.

Again BS hope to have made finding new machines an easier experience for you as a frequent visitor to the BS website.

Your BS Team
